

Readme File for “The Power of Example: Corruption spurs Corruption” (Project ID: openicpsr-118971)

By Nicolas Ajzenman

The replication folder contains three subfolders:

1. *Data*: contain all the data needed to run the do-files. This includes census and administrative data (Censo), Cheating data (Bases Madre), Political Data (Base Presidentes), Corruption Data (Data_Corruption) and Survey data (Longitudinal). The folder “BasesAnalysis” contains data that is created from the original files, using the do-files described below and the folder “Temporal” contains temporary files.
2. *Do*: contains all the do-files. Running the Master do file will run all the commands to replicate all the tables and graphs.
3. *Graficos*: graphs are there (and they are created in the do-file)
4. *Tables*: contain all the logs of every table of the paper

To replicate: run the Master do File changing the path in line 11.

All analyses in the paper were run using Stata MP 15.

MAPPING OF TABLES AND FIGURES IN THE CODE:

- * Figure 1: not produced in the code (it's an illustrative timeline with no real data)
- * Figure 2: not produced in the code (it comes directly from Google Searches)
- * Figure 3: MergeAnalysisBaseCompleta2.do (line 432)
- * Figure 4: MergeAnalysisBaseCompleta2.do (line 544)
- * Figure 5: not produced in the code (it's a map based on public data that can be downloaded from here <https://www.ine.mx/actores-politicos/administracion-tiempos-estado/catalogo-medios-aprobados/>)
- * Figure 6: MergeAnalysisBaseCompleta2.do (line 987)

- * Table 1 : MergeAnalysisBaseCompleta2.do (line 487)
- * Table 2 : MergeAnalysisBaseCompleta2.do (line 500)
- * Table 3 : MergeAnalysisPrimarias.do (line 177)
- * Table 4 : Values.do (line 670)
- * Table 5 : Values.do (line 703)
- * Table 6 : MergeAnalysisBaseCompleta2.do (line 925)
- * Table 7 : MergeAnalysisBaseCompleta2.do (line 955)

- * Figure A1: MergeAnalysisBaseCompleta2.do (line 417)
- * Figure A2: MergeAnalysisBaseCompleta2.do (line 24)
- * Figure A3: MergeAnalysisBaseCompleta2.do (line 586)
- * Figure A4: MergeAnalysisBaseCompleta2.do (line 754)

- * Table A1 : Descriptivas.do (line 14)
- * Table A2 : Descriptivas.do (line 14)
- * Table A3 : Values.do (line 821)
- * Table A4 : not produced in the code (it was taken directly from the report that can be found in this websites:

https://gabinete.mx/images/estudios/2007/encuesta_nacional_2007.pdf

<https://docplayer.es/45997522-Encuesta-nacional-gobierno-sociedad-y-politica.html> (same information, better resolution)

* Table A5 : Values.do (line 745)

* Table A6 : Values.do (line 775)

DATA SOURCES:

Main Datasets:

- Cheating Data: Secretaria de Educacion Publica de Mexico (SEP). All the files by year can be downloaded from this website:

<https://www.inee.edu.mx/bases-de-datos-inee-2019#planea> (Search "ENLACE"). Files can be downloaded in Excel format by school and year (primary and secondary) for the entire period the test was conducted (2006-2013). In 2019, the files were moved from their original website (www.enlace.sep.gob.mx).

In case a link is broken or a file is missing in the new website, the information must be requested through an open-data request (the data is public, it is not confidential, it does not require any agreement and it is already produced), here:

<http://www.infodf.org.mx/index.php/solicita-informacion-publica/%C2%BFc%C3%B3mo-puedo-solicitarla.html>

The requested data should include the following fields: (a) CVE_MUN (municipality code), (b) CVE_ENT (state code), (c) CCT (school code), (e) Turno (shift), (f) Cantidad de pruebas no confiables por grado (number of tests classified as "cheating" by grade), (g) Cantidad de alumnos evaluados por grado (number of tests per grade), and should be directed to the SEP (Secretaria de Educacion Publica). In the request, the level (Basica Primaria or Basica Secundaria: primary or secondary) must be stated.

Note (1): there are three variables that are not online and the information must be requested through an open-data request (the data is public, it is not confidential, it does not require any agreement and it is already produced), here:

<http://www.infodf.org.mx/index.php/solicita-informacion-publica/%C2%BFc%C3%B3mo-puedo-solicitarla.html>

- (a) The variable indicating if the school is private or public [this variable was never online]. The requested data should include the following fields: (a) CVE_MUN

(municipality code), (b) CVE_ENT (state code), (c) CCT (school code) and (d) public/private indicator, and should be directed to the SEP (Secretaria de Educacion Publica). In the request, the level (Basica Primaria or Basica Secundaria: primary or secondary) must be stated.

- (b) The variable that indicates the number of "groups" or classrooms in each school/year [this variable used to be online but it is not anymore]. The requested data should include the following fields: (a) CVE_MUN (municipality code), (b) CVE_ENT (state code), (c) CCT (school code), (d) Grado (grade), (e) Turno (shift) and (f) grupo (classroom number), and should be directed to the SEP (Secretaria de Educacion Publica). In the request, the level (Basica Primaria or Basica Secundaria: primary or secondary) must be stated. When this paper was written, this data was available only for 2013.
- (c) The variable indicating the number of students per classroom [this variable used to be online but it is not anymore]. The requested data should include the following fields: (a) CVE_MUN (municipality code), (b) CVE_ENT (state code), (c) CCT (school code), (d) Grado (grade), (e) Turno (shift) and (f) numero de estudiantes por curso (number of students per classroom), and should be directed to the SEP (Secretaria de Educacion Publica). In the request, the level (Basica Primaria or Basica Secundaria: primary or secondary) must be stated.

- Corruption Data: Auditoria Superior de la Federacion

There is no single database. Data is provided in pdfs and must be manually transformed to DTA. All the original files, by year, can be accessed here:

https://www.asf.gob.mx/Section/58_Informes_de_auditoria

Click in "Informe del Resultado de la Fiscalización Superior de la Cuenta Pública X" (where X = year) to access each file.

Once there, click in "Gasto Federalizado" (for instance, for 2010:

<https://www.asf.gob.mx/Trans/Informes/IR2010i/Indice/Auditorias.htm>)

Then, look for "RAMO GENERAL 33. FONDO PARA LA INFRAESTRUCTURA SOCIAL MUNICIPAL (FISM)" and click in each municipality to download the report in pdf.

For instance:

https://www.asf.gob.mx/Trans/Informes/IR2010i/Grupos/Gasto_Federalizado/2010_0321.pdf (Aguascalientes, 2010).

- Electoral Data-base (I): CIDAC

The full dataset can be downloaded here: <http://cidac.org/base-de-datos-electoral/>

- Electoral Data-base (II): INAFED Encyclopedia of Municipalities

The data can be downloaded from this link: <http://www.snim.rami.gob.mx/>

There, click on "Informacion Historica" and then "Presidentes Municipales".

To build the database, it is necessary to search by municipality (one by one). First choosing state ("Entidad Federativa") and then municipality ("municipio").

It can be downloaded here: <http://cidac.org/base-de-datos-electoral/>

- Perceptions of Corruption: Gabinete de Comunicacion Estrategica

It can be downloaded (in pdf) from this link:

https://gabinete.mx/images/estudios/2007/encueta_nacional_2007.pdf

Or this one: <https://docplayer.es/45997522-Encuesta-nacional-gobierno-sociedad-y-politica.html> (exactly the same information, better resolution)

- Values Data: Mexican Family Life Survey (MxFLS)

Wave 1) It can be downloaded from here <http://www.ennvih-mxfls.org/english/ennhiv-2.html>

File: http://www.ennvih-mxfls.org/english/assets/hh05dta_all.zip --> contains ALL the datasets used in this paper from wave 1 (

Wave 2) It can be downloaded from here <http://www.ennvih-mxfls.org/english/ennhiv-3.html>

File: http://www.ennvih-mxfls.org/english/assets/hh09dta_all.zip --> contains ALL the datasets used in this paper from wave 2

Additional Datasets:

- Homicides data: SINAIS

Can be downloaded from here:

<https://www.inegi.org.mx/programas/mortalidad/default.html?ps=microdatos#Microdatos>

(Click on "microdatos", and then download the mortality DBF files for each year or group of years, when field "PRESUNTO = 2", the cause of death is a homicide. Note: data downloaded in February-2018, figures could be revised by the government)

- Local media (AM and FM radios):

The data can be downloaded in xls format from here (select year 2010 one file per state)

<https://www.ine.mx/actores-politicos/administracion-tiempos-estado/catalogo-medios-aprobados/>

- Local tax collection data: INEGI

The data can be downloaded in xls format (file "ingresos brutos por municipio", field is "total"):

http://www.inafed.gob.mx/es/inafed/Principales_Datos_Socioeconomicos_por_Municipio

(Note: data downloaded in February-2018, figures could be revised by the government)

- Population data from Census 2005, 2010 and 2015: can be downloaded here (municipality level): <http://www.snim.rami.gob.mx/>

- Radio data from Census: can be downloaded here (locality level):
<https://datos.gob.mx/busca/dataset/censo-de-poblacion-y-vivienda-2010-principales-resultados-por-localidad-iter1>
